

CITIZEN SCIENCE  
ASSOCIATION

---

**May 17-20th, 2017**

RiverCentre  
St. Paul, Minnesota

---

Interested in citizen science and how it is being used across disciplines, geographic boundaries, and scientific fields? Want to see the latest research, projects, trends, and experiments in citizen science?

Join leading researchers, community organizations, educators and others interested in citizen science for four days of:

- 440 presentations- technical talks, symposia, and posters
- A Project Slam competition
- Create Together Day- an expert-led Hackathon to enhance citizen science ideas and tools
- A Night in the Cloud evening event featuring segments from the new PBS documentary series The Crowd & The Cloud
- Opening reception at the Science Museum of Minnesota
- Two days of workshops
- Field trips, a Bioblitz, and a public Festival

**Connect and share:**

@CitSciAssoc  
#CitSci2017

Our conferences give attendees the opportunity to access new resources and build connections that take their citizen science work to the next level. When asked what they loved about our event, people say:

*"I've been networking with new people thanks to the meeting, which has resulted in my being included as a collaborator on some new grants and has improved my access to resources that others have developed. **The networking opportunities afforded by the meeting were truly excellent.**"*

Sponsored by:

UNIVERSITY  
OF MINNESOTA  
Driven to Discover™

*"Becoming aware of the depth and breadth of citizen science across the many disciplines of science, from neurons to great-blue herons, from microbes to whales. **Until you literally 'meet' the people doing this work, it is easy to take it for granted or underestimate it.**"*

**Join us in St. Paul!**
